

MANDANEE

Mandanee Creative Design founded by Siyamak Rouhi Dehkordi in June 2020 In Suzhou SIP, Sharing 20 years experinces in industrial design and engineering . Mandanee put effort in product (industrial) design and transportation design ,creating competetive ,innovative ,original and high quality design for various sectors of the market.

Mandanee means timeless in persian , the keyword underlying the Mandanee design's philosophy , modern ,classy and functional , following new technologhies and trends hoping to design products that will be desired and highly favorable for a long time , making the life easier and more beautiful .

拥有20年工业设计和工程经验的Siymark Rouhi Dehkordi 于2020年6月在苏州工业园区创立了曼达尼创意设计（苏州）有限公司，曼达尼（Mandanee）致力于产品（工业）设计及交通运输设计，为客户提供具有竞争力、创新性、高品质的原创设计。

曼达尼（Mandanee）在波斯语中是永恒的意思，这个关键词是曼达尼（Mandanee）设计哲学的基础，希望用现代、优雅、实用、跟随高科技潮流和趋势来设计产品，这将是一种长期的理想并且极具人文情怀，可以让生活变得更轻松美好。

Hexawheel Concept

Hexawheel is a futuristic concept design ,extreme Off-Road idea, an ennovative articualted Chassies and edgy style that combines modern technologies and aesthetics , published worldwide in 2010.

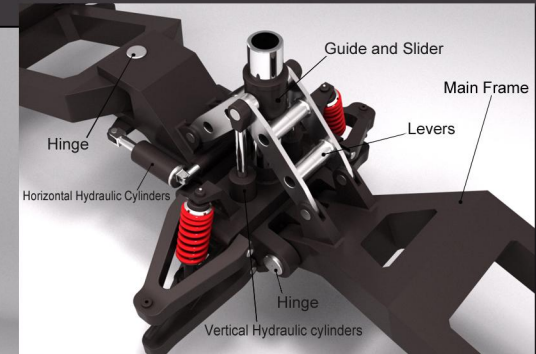

Hexawheel是一个未来派的概念设计，极端越野创意，创新的铰接式底盘结合现代技术的前卫风格和美学，于2010年在全球范围内出版。

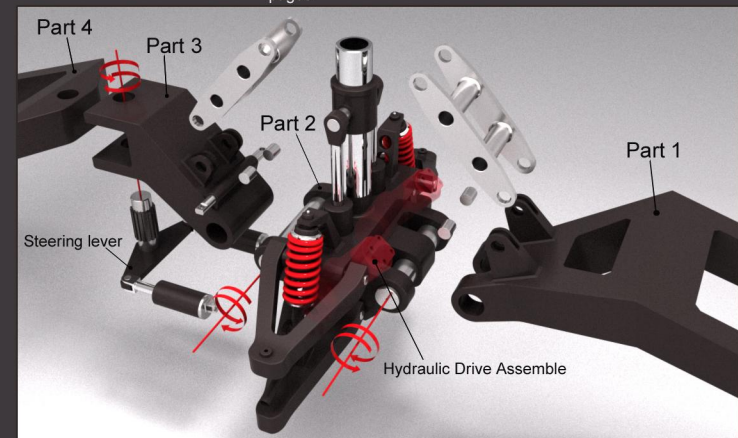

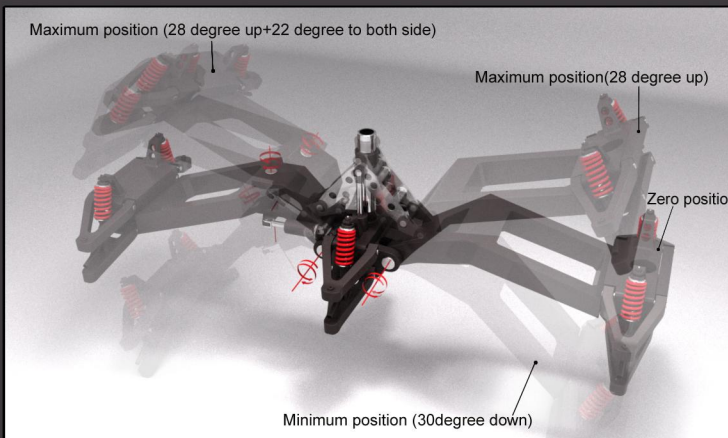

Mercedes Benz-Hexawheel ,Flexible Frame and Mechanism

Designed by Siyamak Rouhi Dehkordi

The Main Frame is composed of 4 parts that are jointed by Hinges and manipulated by 2 twin hydraulic cylinder. A simple Mechanism including Guide and Slider and levers keeps the balance of the main frame and adjusts the car with the obstacles. The main frame has 2 degree of freedom that can be controlled by hydraulic cylinders. Vertical Hydraulic Cylinders operate as an shock absorber in sudden jumping and are almost released where the car moves slowly on a high jagged road with big puddles (low damping coefficient in the low frequent big puddles) and (high damping coefficient in the high frequent small puddles) where the car moves in high speed on a medium jagged road or on a plain road where the shocks should be transferred to the wheels suspension. Horizontal Hydraulic Cylinders check and manipulate the angle of rear part of the car (cargo part) in according to the steering position (almost released in normal road and manipulate the angle in the slippery roads). refer to complementary explanations in the next pages.

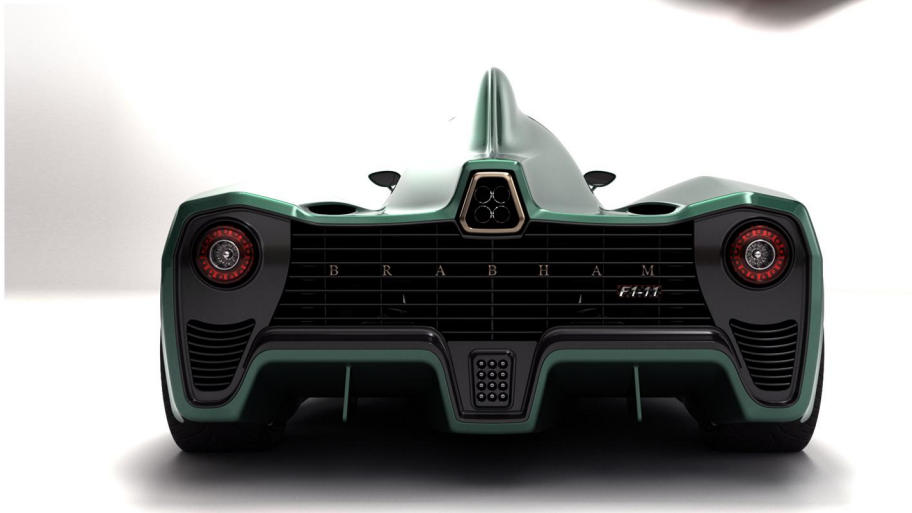

ZOBIN Concept

A single seater super sport car inspired by Ferrari F-1 Racing cars, characterized by special front fender and triangular shape from top view, iconic and high performance looking design published worldwide in 2008 .

灵感来自法拉利的单座超级跑车 F-1 赛车，具有特殊的前挡泥板俯视图为三角形，标志性和高性能外观设计于2008年发表在世界各地。
